

Close-coupled vitreous china universal trap toilet suite

SfB Code
_____ | (74.1) | _____

The Seido Wall Faced toilet suite crafted from high density vitreous china. It has a superior and modern product design. The close coupled styling combines soft geometric forms on the pan and the cistern to appear as a single unit, eliminating the need for a conventional flush pipe. This creates a toilet suite which is distinctively appealing and easy to clean. A secure cistern fixing system is standard which eliminates the need for wall fixing. The cistern incorporates a proven, reliable dual-flush mechanism, which will ensure optimum flushing performance, together with a 4 star water efficiency rating. The Fowler quiet, fast filling inlet valve fitted as standard. Due to the substantial water saving achieved by the 4.5/3 litre dual flush system the matched suite can be used for septic applications.

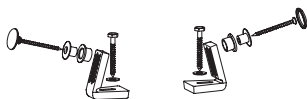

Installation guidelines

Pan: Floor mounted-sunk into bedding mix or bonded to the floor tiles with acetic-cured silicone sealant and fixed with brackets and screws supplied.

Outlet connection: PVC, copper or cast iron.

Inlet connection: Close-coupled connection.

Cistern: Mounted directly onto the pan with bolts and wing nuts and foam cistern seal without the need for wall fixing.

D80 Concealed Fixing Kit
